

TECHNICAL DATA SHEET

Marine Iron Active Foam

Active foam for iron and salt decontamination

Product description

Marine Iron Active Foam is the second step in preparation surfaces for protection with coating. The formula is specially designed for the removal of metal particles and salt adhered to the surfaces. Suitable for glass, paint and all types of materials (metal, aluminum and plastic). The chemical reaction causes all the particles of air rust and dried salts in contact with the cleaner to dissolve into a water-soluble mixture that can be easily removed with water.

The product is ready to use and completely safe for the external surfaces of the vessel. **Marine Iron Active Foam** is odourless, 100% biodegradable and environmentally friendly.

Use of product

Marine Iron Active Foam is used for iron and salt decontamination of exterior surfaces of vessels.

Product benefits

- removes metal particles and air rust,
- removes salt adhered to surface,
- suitable for glass, paint and all types of materials,
- prevents damage to the gelcoat,
- highly efficient,
- safe to use,
- 100% biodegradable and environmentally friendly.

Application instruction

1. Spray on the surface.
2. Let the foam run for a few minutes - don't let it dry.
3. Rinse with plenty of water.
4. Dry the surface and then use **Marine PRE-WIPE** for final decontamination.

Product information

Appearance	Liquid
Color	transparent
Best before	
Storage conditions	Store in a tightly closed container in shade below 30 °C. Protect from frost.
