

NanoCoatex

SPRAYABLE

GLASS COATING

ECOLOGICAL

Our water-based, organic product is safe for you, the environment, and all types of surfaces. It is VOC/solvent-free.

EASY TO RECOAT

If you notice that the coating is losing its hydrophobic effects, it is easy to simply clean and recoat that the surface restore all of the coatings original properties.

EASY TO CLEAN

Dirt, bugs and ice have a difficult time adhering to the surface of the glass, allowing for easier cleaning and significantly less scraping of ice. It also shortens the amount of time needed to defrost your windows.

LONG LASTING

One layer of coating creates a film up to 2 microns thick that protects the surface from micro scratches.

FAST APPLICATION

We have the most revolutionary and easy-to-apply coating on the market with our spray and buff application process. This makes our coating the fastest application.

SAFER DRIVING

Quick beading and sheeting effects will improve your visibility when driving in bad weather, such as rain or snow.
